Prolific Inventor Shares His Shark Tank Experience

Mark Sullivan

Mark Sullivan, a prolific inventor, scientific researcher and Hollywood special effects developer, will share his first-hand experience when featured on ABC's Shark Tank at the April 2013 Alamo Inventors general meeting.

Recently Mr. Sullivan presented one of his inventions to the panel of five wealthy business people as a guest on ABC's hit reality TV series "Shark Tank". He was chosen from over 24,000 applicants to pitch his patented electric generator, that harnesses energy from the spin of the Earth. During every episode, the Sharks look for the best product and business proposals in America by listening to aspiring inventors and entrepreneurs talk about their ideas and how much funding they need to launch their innovations. He will speak about his experience from his initial submission to the airing of the show and the response of the audience.

Mark was educated at Peacock Military Academy, the University of Texas Health Science Center, the Universidad de Las Americas and the University of Texas at Austin. Mark worked in research to help map the E.coli genome, developed an artificial lung for premature infants, invented advancements in peritoneal dialysis, and created the first medical day care in Texas. This MENSAN inventor/technician has worked on many interesting projects including building Porsche racing engines, as a door-to-door bacteria salesman and even as a leech farmer (or in Texas it may be a leech rancher). Mark holds an ATF explosives license and has designed or built special effects for over 100 feature films and commercials. He has copyrights on screenplays, music and art. He is a certified US Coast Guard Seaman and holds a current Texas Department of Health radiation safety officer license.

Visit Mr. Sullivan's website at www.marksullivanresearch.com.

Also, please take this opportunity to pay your annual dues (\$25/\$95 Corporate), thanks!

Wednesday, April 10, 2013

5:30-6:30 Networking 6:30-8:00 PM - Presentation

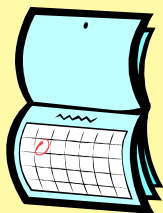

San Antonio Technology Center

3463 Magic Drive

(North of I-410 Between Callaghan and Fredericksburg Roads)

Public Invited

Special Thanks For: Refreshments Provided by Marx Design

Alamo Inventors, a Special Interest Group (SIG) of Technology Connexus Association, is a non-profit organization made up of local area engineers, business people, professionals, students, faculty and people from all walks of life. Anyone interested in inventing and/or business and product development is welcome to attend and become a member.
