Twelve Events That Will Change Everything

Dr. William C. Davis

Dr. William C. Davis will be our speaker for January 2011. Dr. William C. Davis, inventor, professor emeritus and former chair of the department of natural sciences at St. Philips College has lived a remarkable life by following his instincts. Meeting and gaining insight, wisdom and inspiration from historical luminaries including George Washington Carver, Henry Ford, Thomas Edison, Ernest Hemmingway, Martin Luther King, Jr. and Wernher Von Braun, Dr. Davis decided to choose a career path leading to being of service to people, to make life more livable. Some of Dr. Davis' important discoveries include adding arabinogalactans (a crystalline powder) to potatoes to render a more appealing consistency for instant mashed potatoes, a wood sugar leading to an industrial glue used in compressed wood, developing a process for the efficient standardization of blood testing for insulin and growth hormones, which resulted in better diagnoses, and identification of a sugar to provides texture for frozen desserts.

Dr. Davis has been concerned about the feeding of the world's population, growing shortages of energy and reliance on fossil fuels. He will present what he considers twelve events that will change the way we live and work as well as tips for inventing success.

Also, please take this opportunity to pay your annual dues (\$25/\$95 Corporate), thanks!

Wednesday, January 12, 2011

**5:30-6:30 Networking 6:30-8:00 PM – Presentation
After meeting networking @ Black Eyed Pea**

San Antonio Technology Center

3463 Magic Drive

(North of I-410 Between Callaghan and Fredericksburg Roads)

Public Invited
