

## Wounded Warrior To Inventor To Entrepreneur

Gary Walters

Gary Walters, cofounder of Leto Solutions, Inc., [www.letosolutions.net](http://www.letosolutions.net), is our speaker for January and will provide details on how his start-up company developed and is beginning to market a new innovative patent pending cooling system for prosthetic limbs.

Gary, a mechanical engineer, was injured in Iraq while serving in the Army. Upon retiring from the Army, he attended UTSA and graduated with a BS in Mechanical Engineering in the spring of 2013. As part of his coursework at UTSA, Gary and a team of fellow engineering students developed the Aquilonix Cooling System for below the knee prosthetic limbs. Upon graduation, the team paired with Becky Ariana, an experienced businesswoman in the medical device field, to launch Leto Solutions and bring this transformative technology to the market.

During his presentation, Gary will describe the Aquilonix System and how it provides a thermoelectrically cooled environment within the prosthesis that cools the space and dissipates heat. Also, he will expound on the system's various phases of development including, the initial concept, prototype designs, prototype testing and manufacturing parameters. Moreover, Gary will briefly describe fund raising campaigns, marketing strategies and the many awards the system has won.

Also, please take this opportunity to pay your annual dues (\$25/\$95 Corporate), thanks!

**Wednesday, January 11, 2017**

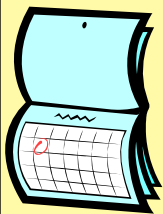

**5:30-6:30 Networking 6:30-8:00 PM - Presentation**

**San Antonio Technology Center**

**3463 Magic Drive**

(North of I-410 Between Callaghan and Fredericksburg Roads)

**Public Invited**

Alamo Inventors, a Special Interest Group (SIG) of Technology Connexus Association, is a non-profit organization made up of local area engineers, business people, professionals, students, faculty and people from all walks of life. Anyone interested in inventing and/or business and product development is welcome to attend and become a member.
