

DIY – From Concept to Market Jürgen Schmidt

Jürgen Schmidt, co-owner of the DNMS Institute, will be our speaker for September 2011 and will speak on DIY – From Concept to Market. Jürgen will present how he and his wife, Shirley Jean, invented, patented, marketed and manufacture the TheraTapper™ in their home-based factory. The TheraTapper is a device used by psychotherapists in conjunction with treatment protocols such as the Developmental Needs Meeting Strategy (DNMS) and Eye Movement Desensitization and Reprocessing (EMDR) and is being sold worldwide.

Jürgen's varied background includes growing up and working with erector sets; HeathKits; model rocketry; jewelry-making; woodworking; programming mainframes, PCs and embedded systems; and the Boy Scouts. Jürgen has over 30+ years in software development as well as printed circuit board, PCB, design and prototype development. He is presently Business Manager at DNMS Institute LLC and a software engineer at JGSCRAFT.

When not performing manufacturing and shipping DNMS Institute products, Jürgen continues exploring and learning new things. His most recent project, a web-browser controllable thermostat, is featured in a two-part article in the September and October issues of Nuts and Volts Magazine. For additional information, visit www.theratapper.com and www.jgscraft.com.

Also, please take this opportunity to pay your annual dues (\$25/\$95 Corporate), thanks!
