

Using AI To Innovate Andrea Arndt

Unresolved questions on how AI relates to patent law can make the landscape hazy for inventors and business owners. AI can help inventors explore ideas and solve problems, but how does using it affect patent, copyright, and other intellectual property protection? Who qualifies as the inventor when AI helps develop an invention? Who qualifies as a creator when AI helps create an image, song, story, or video?

[Andrea](#) will discuss these questions and the USPTO's current guidance on AI-assisted inventions, building on her September 2026 Inventors Digest article, ["Using AI to Innovate" \(pages 38–40\)](#). Attendees will learn about human inventorship, documenting their contributions and protecting confidential information when using AI tools.

Questions are encouraged during the presentation.

Andrea is a Member in [Dickinson Wright](#)'s Austin office, where she advises startups and global companies on patents, trademarks, copyrights, licensing, and related enforcement. She holds degrees in law and is registered to practice before the US Patent and Trademark Office as well as B.S. degrees in biomedical and computer engineering.

See www.alamoinventors.org to register for the Zoom presentation.

[Join/Renew](#) Alamo Inventors annual membership (\$25 Individual/\$95 Corporate). Thanks!

Wednesday, October 14, 2026

6:00 – 6:30 - Q&A; 6:30-8:00 PM – Presentation

See Note Above.

Public Invited

Alamo Inventors, Inc. is a 501(c)3 non-profit corporation made up of local area engineers, business people, professionals, students, faculty and people from all walks of life. Anyone interested in inventing and/or business and product development is welcome to attend and become a member.
